

# SIMPLE SELFIE GUIDE

## FOLLOW THESE TIPS TO TAKE A GREAT SELFIE:

Look for the light. Natural, indirect light is best for your photo, but any light helps.

Bring the phone closer to your face and experiment with angles to see what looks best.

Alone? Use two hands to use the camera. Group? Find the friend with the longest arms!

Look for a fun background and use any available products or branding around you to make your photo more interesting.
